

# ***JIAJIE FULLY AUTOMATIC STRAPPING MACHINE***

***MODEL: JDB-PZ-1300***

MORE INTELLIGENT  
MORE ADVANCED  
MORE RELIABLE  
MORE STABLE

Fully Automatic  
Strapping Machine 

Corrugated Cardboard 

Double Head Bundling 

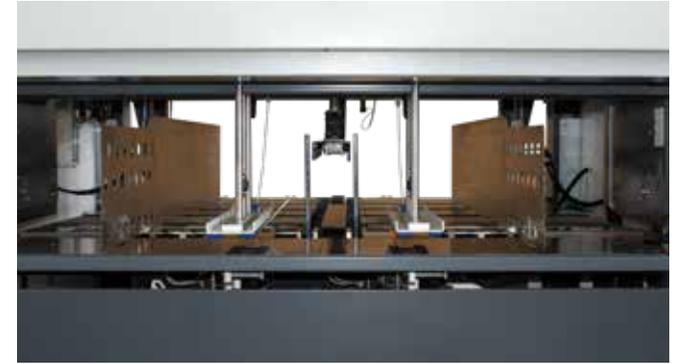

Energy-efficient  
Electrical Drives 

For PP-Straps 

MORE ENERGY-EFFICIENT

## Local description

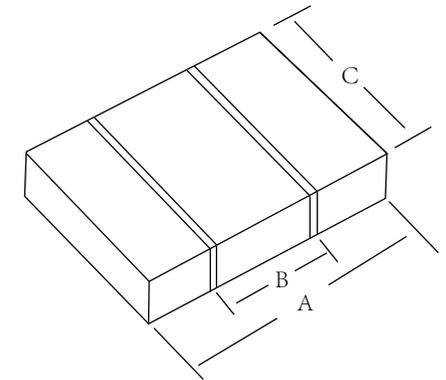

## Features of the machine

1. Machine adopts integrated frame structure, with features of good rigidity, compact structure, easy operation and high production efficiency, the maximum bundling speed can be up to 20 packages per minute.
2. Saving labors and increasing yield.
3. Machine adopts PLC programmable controller, servo motor and touch screen control, it can achieve intelligent identifying of the subject size and control the bundling force moment, it will adjust each part to correct position through installed system.
4. High safety standard, each door is equipped with limit switch. Machine will not work when they are open to protect the operator and machine.
5. PP rope bundles the subject with less damage to its surface, compact and good looking.

The bundling size depends on the subject length (C), conveying belt speed and selected bundling mode.

Subject Length ( C )	Bundling Speed ( packages/min )
< 600mm	20
< 1200mm	16
> 1300mm ( use single pusher )	(Maximum)10

## Specification

Model	JDB-PZ-1300
Melting Method	Heating
Rope Width	5mm
Rope Thickness	0.35-0.55mm
Rope Stocker Diameter	( Inner Diameter ) $\Phi=200\text{mm}$ ( External Diameter ) $\Phi=380\text{mm}$
Transmit speed	0.15-0.8m/s ( frequency control )
Total Weight	1500Kg
Total Power	6.7Kw
Voltage	( 3P 5W ) 380V 50HZ
Double Head Working	A Min.400mm A Max.1450mm C Min.240mm
Single Head Working	A Min.200mm A Max.1450mm C Min.240mm
